the device

## 1. Device

## 2. Charging

The AMB306 uses a micro USB charging cable that connects to any 5.0V Ac adapter. Red lights will come up, charging time for AMB303 is 8 hours. Device run time is 24 hours and will require charging after this. It is advised that the AMB306 be charged nightly.

## 3. Lights

Battery Light	
Flashing red	Low or charging battery
Steady green	Battery charged

GSM Light	
Flashing green	Searching for GSM signal
Steady green	Battery charged
Flashing blue	Attempting to get data connectivity

## 4. Insert SIM card

Open device case by prying the rear cover.  
Lift the battery out of the case.  
Place nano sim card onto tray then close tray.

## 5. Power on Device

With device off, press and hold the Power button for 5 seconds, the device will vibrate and a melody will sound. The three LED lights will begin flashing.

## 6. Send SOS to App or monitoring station

Send SOS to App or monitoring station by holding the SOS button for 2 seconds.  
An SOS message saying emergency "device name" needs. Assistance will be sent.

## 7. Voice call the device from the App or mobile

Make direct telephone calls from the App to the AMB306 by Opening App/Safety/Set Safety Alerts/Device Phone Number/Enter your password, click Submit/ Tap the green telephone icon.

## 8. Voice call the App or mobile phone from the device

Go to App/Safety/Set Safety Alerts/Add emergency numbers/insert Name, email address and your mobile number with area code, example: 1876-555-5555. (A maximum of only two mobile numbers are allowed, this feature does not support a PBX land line)

To make direct telephone calls to the mobile phone from the AMB306 by pressing the pre-set configurable button, this will cause the mobile phone with preinserted SOS numbers to ring.

## 9. Power off device

Press and hold power button for 5 seconds the device light with glow red then go dark

## 10. Troubleshooting tips

On the box identify the 15 digit QR Code.

Go to App/Dashboard/Add device, enter QR Code. Plug in device to power socket and charge for 30 minutes. Remove cover and remove battery then re-seat sim card. Power on device and take it for a trip around the block or for 1 Km. Check App to see if device shows its current location.
